

# Guess the Number Game

This is a simple web-based game where users attempt to guess a randomly generated number between 1 and 100. The game provides feedback on whether the guess is too high, too low, or correct.

## Features

- User-friendly interface with Bootstrap styling.
- Displays a description of the game.
- Real-time feedback on user guesses.
- Responsive design suitable for various screen sizes.

## Technologies Used

- **HTML:** Structure of the web page.
- **CSS:** Styling with custom styles and Bootstrap for responsiveness.
- **JavaScript:** Logic for the game functionality.

## Getting Started

### Prerequisites

- A modern web browser to run the game.

### How to Run

1. Clone the repository or download the HTML file.
2. Open the index.html file in your web browser.

## Game Instructions

1. Enter a number between 1 and 100 in the input box.
2. Click the "Check" button to see if your guess is too high, too low, or correct.
3. Keep guessing until you find the correct number!

## License

This project is open source and available for use and modification.

## Acknowledgments

- Inspired by simple number guessing games.
- Bootstrap for styling and responsiveness.
